 WaffleHacks

Our Story

When everything turned virtual, it seemed like all hope of a spectacular summer went away. Thankfully, by harnessing the power of technology, a group of first-year college students were able to connect and form a warm, supportive community. One of the things they did was participate in hackathons. They loved it! They wanted to share that joy with others so they created WaffleHacks. WaffleHacks wants to inspire students to look at their communities and see how they can help others.

WaffleHacks (July 9th - 11th)

We're proud to present its first annual WaffleHacks Hackathon, held in a virtual setting. WaffleHacks is a beginner-friendly hackathon that encourages students to develop and use their skills to make a lasting impact on local issues.

We anticipate to create an event that will allow students to start thinking about what they can do to improve their communities and inspire the next generation of changemakers.

Why Sponsor Us?

We are hoping to expand the reach of WaffleHacks in the next few years, and we hope your generous contribution can be the first step in this mission. Our goal is to create a really engaging event for first time hackers and your support would allow us to reach that goal.

Information regarding each tier of sponsorship and sponsor perks are included in the next page. If you would like to sponsor or have any questions, please email us at: sponsorship@wafflehacks.tech

Thank you for your time and consideration! We look forward to hearing from you!
